The screenshot displays the Glassdoor website interface. At the top, the 'glassdoor' logo is on the left, and a search bar contains 'web designer' with a location filter set to 'Rochester, NY'. Below the header, navigation tabs for 'Jobs', 'Companies', 'Salaries', and 'Interviews' are visible. The main content area is divided into two columns. The left column lists several job postings, including 'eRecord Instructional Designer' at the University of Rochester, 'Freelance Wordpress Designer and Developer' at Buddy Web Design & Development, 'Web Developer / SQL Developer' at YellowPageCity, and 'Lead Graphic Designer' at Whole Latte Love. The right column provides a detailed view of the 'Web Designer' position at CGI Communications, which has a 4.3-star rating. This detailed view includes the job title, location, salary range (\$33K - \$70K), and a list of characteristics and must-haves for candidates.

CGI Communications 4.3★
Web Designer
Rochester, NY
\$33K - \$70K (Glassdoor est.)

Characteristics our dream candidates possess:

- Ability to juggle multiple projects at one time with ease and grace (they won't be on fire, we promise)
- An intense attention to detail - teetering on the line of perfection (don't worry, we know no one's perfect)
- Creativity running through your veins (running, not jogging)
- Basic troubleshooting skills (for print/web products)

Must Haves:

- Experience with HTML/CSS/WordPress/Divi
- Adobe Creative Suite
- Microsoft Office (Word & Excel)/Google Gsuite (Docs & Sheets)

- This job posting requires candidates to have experience with the Adobe Creative Suite, Microsoft Office/Google Suite and HTML/CSS/Wordpress. The employer would also like the candidate to be creative, attentive to detail, able to work on multiple projects and have basic troubleshooting capabilities. Since this position requires candidates to be creative and have experience with Creative Suite and HTML/CSS, it's a Front End position.
- Candidates will need to use CSS/HTML and creative tools in order to do this job. HTML/CSS are programming languages used by developers to create the looks and feel of websites, and to display artwork created by other programs, which is why candidates must be able to use Adobe Creative Suite - to create their own artwork - and HTML/CSS - to display the images and design the website.
